Impulses that Move Us

How to become conscious human beings!

We must deny the self in order to operate consciously. Jesus said that in order for us to come to the light we must first deny ourselves. He said: “I am the way and the light, if a man wants to follow me let him deny himself”.

The subconscious mind is a very dark place; it is where the devil operates; it is where Satan takes hold of our lives. His impulses coming from our subconscious mind drive us to behave despites of ourselves. Subconsciously every time we meet someone, we are compelled to affirm or negate that person. We are doing the same as Adam and Eve when they consumed the fruit of good and evil. Adam and Eve did not know that they were naked until they ate the fruit of the knowledge of good and evil. This process allows us to have a sense of self. Without this process we have nothing to measure ourselves against; it gives us a point of reference to know who we think we are or what we are not. We must deliberately deny this process if we want to be in the light of Christ.

Jesus said: “I am the way and the life; I am the life and the light”. If a man wants to follow Me, *let him deny himself*’ We must first renounce the process that gives us our self identity. He said: “And let him pick up his cross and follow Me”. We must also embrace the weaknesses and short comings of our fellow human beings. This embracing the suffering of our fellowmen is the way of the cross. We must show love and compassion for our fellowmen. “If a man walks with Me, he shall not walk in darkness but has the light of day”. If we want walk in the light we must live the life and follow the steps that Jesus prescribed to us. “The life and the light” If we walk in the light of Christ we will become conscious human being, knowing full well why we act and what move us to act. We will not be puppets like we are now at the mercy of impulses driving us to behave despites of ourselves. This is the triumph for being in the light, it makes us conscious human beings, not puppets reacting to impulses that we have no control of.

“For that He came to destroy the works of the devil, to undo the works of darkness”.
Jesus came on earth for one purpose that is to destroy the kingdom of darkness and

establish the kingdom of God . “Now the darkness is cast out, the ruler of this world is cast out”.

What are the works of darkness? What is it means to be in the dark?

To be in the dark is to act despites of ourselves, not knowing the consequences of our actions. The darkness of this world is the subconscious impulses that drive us to violate the law of God without us being aware of that. Eve was driven to consume the fruit of the knowledge of good and evil not knowing the full consequences of her action. We are driven by the same impulses that drove our parents to consume the fruit of the knowledge of good and evil. We are still consuming the same fruit today. Every time we meet someone, we are force to make a judgment of that person and use that judgment for our benefit as such we are consuming the fruit of the knowledge of good and evil. Every time we violate that law God withdraw himself from us. The devil cannot do anything to us until we are separated from God. The devil knows that in order for his kingdom to work and get control over us he must separated us from God. We can only do the works of the devil if we are not under God; therefore the devil had to trick us to violate the law of God. The trick of the devil is to have us disobey God without us aware of it. If we are aware of it we would also be aware of the consequences of our actions. The works of the devil are called the kingdom of darkness because we are maintaining his kingdom without us aware of it. We have no awareness that we are doing the bidding of the devil. It is a subconscious process.

Everything in the world is connected to that one act, the act of consuming the fruit of the knowledge of good and evil. Only if we could stop consuming the fruit of the knowledge of good and evil but we cannot; this is why Jesus said that we must be in the world and not of it. We cannot stop consuming the fruit because it is what makes the world what it is, the only way to really stop eating the fruit of the knowledge of good and evil is metaphorically. We can only walk the line between two worlds, between good and evil, between terror and wonder. This process of affirming and negating is the first steps in knowing what is good and what is evil. Using this knowledge is what gives us our self awareness. This process is engrained in nature; it is imbedded in the human psyche. The whole of life seems to revolve around it. The forces that drive humanity forward and the forces that restrain humanity backward are seem to be both connected to that process.

Dear Kim/One

You agency is doing a fine job against poverty in Africa. People volunteering their time to help you because they believe in what your agency is doing. I also believe that when they join you their intent is to see an end to poverty, not just to an ease to the pain and suffering. While most volunteers join you with the intent to end poverty they don't know the real cause of the kind of poverty we see in Africa . They don't know what forces are at work responsible for sustaining the kind of poverty we see in Africa .

Question

Do you want to get rid of poverty in Africa or do you want only ease the pain and suffering brought by poverty to Africa ?

I can help equip your volunteers with the knowledge they need to confront poverty at its source.

Africa is a casualty in the struggle between the two forces that shape humanity; three quarters of people who live in poverty in the world live in Africa . To exclude Africa out of the world population is to reduce poverty around the world by eighty percent. There are two things in the world that require no special inclination on our part to be concerned about; it is poverty and aids. You don't have to be a philanthropist to be concerned about poverty or aids. Everybody agrees that if there were less poverty and aids in the world, the world would be a better place to live. Poverty and Aids are the most consuming human conditions that capture our attention in the world and they are both found at a disproportionate level in Africa . Even tough Africa is considered first in many ways; the birth place of mankind and the cradle of civilization yet without poverty and aids it would not be much of importance to the rest of world. To be first is to incur the curse of the first born. It is said that the first shall be last making way for the new. This is the way of things; this is nature in action. Nature has a way of negating the first born, build on it and use it as a stepping stone for the next stage. Africa has been used as a stepping stone. This is the way of nature and this way of nature is Negation. Negation is imbedded in the human psyche; it is interwoven in nature. We need to understand Negation, how it operates in nature and in human lives in order to get rid of poverty and the epidemic of aids that it sustains. Research needs to be done to establish the relationship between poverty and Negation. If you want your volunteers to help your agency eradicate poverty in Africa they need to learn about Attainment and Negation. If you are interested to know about Attainment and Negation I can send you more info.

Recently I was listening to a writer who wrote a book about sewer systems on a radio station in the US . He made reference to **Dr. Bindeswar Pathak, Sulabh Movement**. I was impressed; I believe that that if this Dr. Bindeswar saved India from becoming a dump for human waste, he can help save a small island like Haiti from the same fate. This writer made reference to other countries in Europe who made use of electricity, fertilizer and other product from the sewer system on their toilets. Please inform me of the technology that you have used to control human waste in your country and if this technology applicable to Third World Countries. What other systems or technologies that have been used in other countries that you may suggest that I may try in Haiti . The situation is critical there; I was told by a friend that the air in the Haiti is about 90% filled of human waste. Please let me know what is applicable and what is feasible to solve this situation. Your country is an emerging country confronting third world problems and you have made great progress. I am sure what works for your country may also work for Haiti .

Thankfully, yours truly
