The Education Sphere:

Education is a field of study as important as science, medicine or business. Our teachers, educators play an important role in molding the mind of our children and pass on to them the knowledge that we have accumulated over the years, from one generation to the next. “How can they learn without a teacher”? Salomon asked. To be become wise and learned our children need knowledge and that knowledge can only pass on to them by our teachers and educators.

What are the Spheres?

The Seven Spheres That Shape Nations

“There are seven spheres or mountains that shape cultures and mold nations”

The Seven Spheres of Influence

1. Religious Sphere: God: The Church, Religion, Faith
2. Art Sphere: Music, Songs, things we laugh at
3. Media Sphere, spin machine, Talk show, Entertainment
4. Government Sphere: Write the law, the support system
5. Education Sphere: Teaching children, shaping their mind
6. Family Sphere, parents shaping children
7. Business Sphere, Finance, Technology

Education Sphere:
The education sphere is one of the seven mountains or spheres that shape cultures and mold nations. A nation draws it energy from all
of the centers; education is one of the primary centers that are driving nations to excel and move forward. Right now Finland has the best education system in the world; other countries are copying from them trying to replicate their success. Government officials are taken measures to understand the role that the education sphere plays in making or breaking a country. They are bringing innovators, people with fresh ideas and new approaches to teach our children. In the forefront of that effort individuals like Michelle Rhee ex-school Chancellor of DC, Mike Perry, Andre Agassi and Geoffrey Canada; these people are pioneers when it comes to improve our education system. Their approaches to education are innovative, different from the way we know. If the government can get them all together under one roof, forcing them to overlap their skills, their gifts one to another; this country may come up with a new system to educate our children.

Starting with a Clean Slate, educating our children from an early age with this new system is important if we are to make an impact in our culture. Raising leaders for tomorrow, prepare people; getting them into a state of Convergence at an early age is important if we want our country to move forward. People need guidance; they need the God kind of influence to be successful; incorporating the power of Convergence in the academic curriculum starting at an early age will ensure that we have sound leadership for tomorrow.

The Third World will not see a fundamental change without leaders who can lead successfully their own people out of their conditions. The Power of Convergence is a tool to teach people, to prepare them to leadership by teaching them how to subordinate themselves to God so that He can lead them to achieve success in their assignments.

**The Clean Slate Project**

"It is easier say than done but I can assure you that there is a way and that way is from the ground up, starting with a clean
slate. Hence the Clean Slate Project is born. “There must be a radical departure from the normal way of doing business”. The clean Slate Project is teaching our children at an early age the right way to live, living the lifestyle that guarantees them an increase in their cognitive ability, an increase in their intuitive capacity; make them fluid and flexible so that they can respond to the subtle changes in the world around them, in their environments. We believe in educating the whole man, body, mind and spirit, making the intellect an instrument for the spirit rather than the other way around. We believe that intelligence is measured by how we flow with the universe, the world around us. We believe that there is a quickening that comes with living a certain way; we teach that way of life to our children. We create the environment that is conducive to learning and make sure that our teachers are devoted and passionate in their teaching assignments. There is a vacuum of leadership in the Third World simply because the way to the spirit is not known, God is not in their midst to guide them. It is all in the life, the way we live, a particular lifestyle that guarantees us an increase in our awareness; we sincerely believe that if you live the life, you are guaranteed an increase in your cognitive ability and in your intuitive capacity. All in all living that lifestyle will quicken you, make you fluid and flexible. There is no need to continue to have slums and ghettos around us if our leaders can respond to the needs of their environments. With The Power of Convergence as a tool and with the Clean Slate Project we aim at making the world a better place for all of us, a Better Living World.

There is no need for such a world to continue to exist, a Third Rated World with the right kind of education:
The Solution
A World to Come

"Transformation of our slums and ghettoes will not be achieved by technology but by awareness, awareness of the forces that restrains us and keep us behind" To achieve that state of awareness we need to be quicken by the lifestyle that guarantees us an increase in our cognitive ability, in our intuitive capacity, a sure way to make us fluid and flexible, able to make the sharp turns when time requires it.

“A time soon will come when dispensation on earth will be given to all according to righteousness not as the devil wants it. We need to make our leaders accountable for righteousness and justice if our nation is to prosper and excel. There would be no need to emigrate, leaving our countries behind to escape poverty if our leaders were righteous men. Our countries could be prosperous and as prosperous as the countries we sought refuge from. Can we talk about the future? Today we are a new creation thanks to God who sent His Son to undo the works of darkness”.

A time will soon come when dispensation on earth will not be given to us by our affinity to the forces for Attainment or Negation but by righteousness. Transformation of our slums and ghettoes will not be achieved by technology but by awareness, awareness of the forces that restrains us and keep us behind. We will be free to
express ourselves without encumbrance and interference from negation. Our thoughts will flow without opposition; we will be able to communicate our thoughts and feelings to one another freely.

A time will soon come when dispensation on earth will be given to us for our righteousness. *The government of this world rests on His shoulders and in righteousness He shall lead the world.*

"*In you and in your seed I will bless all of the family of the earth*”. This is the future we are hoping for, this is the world to come we are hoping for where everyone will be blessed, everyone will be able to partake in the abundance of this life, not just a few as it is now by affinity to color or what a person’s color represents.

A time will soon come when we will gain strength and power by embracing each other weaknesses and short comings; that is taking up our crosses.

We are free creatures; we are gifted with the free will faculty, therefore capable of making choices. The future can be grim and bright to the Haitian people if they so chosen. “*Here I put before you life and death, chose life*” If we chose life, life will fallow us, but if we chose death, death we shall have. The stocks against us are many, we have much opposition to the blessing and the abundance of this world, but it is not impossible to overcome. Collectively we can still achieve prosperity and abundance as a people, even make history to be the first to change the laws that govern the collective. For the first time, blacks can partake in the abundance of this world; circumvent the forces of Negation that restrain them.
A time will come when it will be come necessary for a human being to express himself from a level of truth. This place of truth is a place where the whims of nature no longer operate. It is a place where falsehood no longer operates, where the truth is the only reality. A time will come when our strength and power will be measured by how much compassion we have toward one another, how much we can embrace the weaknesses and short comings of our fellow human beings.

More................to come......
